### SPORT'S DAY

Favored by ideal weather, Carbon Sports Day was another success. A big crowd from all over the district: from Strathmore to Trochu and from Drumheller to Acme, gathered in town in the morning. Never has there been so many people gathered together in Carbon. The Sports occupied the afternoon, with many variations, and in the evening a Dance was attended by such a crowd that there was hardly any standing place. It was the end of a perfect day. As the time to make up this issue is so short, we will publish in next week's issue a detailed list of the winners of prizes on the sports programme.

### LOCAL NEWS

Mr J. Williams, Health Inspector of Edmonton, was making an official visit to Carbon this week, and has sent notices to a few citizens in order to improve the sanitary conditions in Carbon. Mr. Williams, accompanied by the village Councillors, has also done a little prospecting for a nuisance ground. Mr Williams has also requested this paper to point out, that he has been lenient with certain conditions in this town, but that on his next visit he will use the law in order that we may be exempted from any contagious epidemic, such as we went through last year. In next week's issue we will publish a letter from Mr. Williams to this effect.

In the absence of the Aeroplane on Sports Day, a Stork came flying over the town and dropt a big, healthy young daughter at the home of Mr and Mrs Birch.

Mr W. Watson, of Drumheller, was a visitor to Carbon on Sunday afternoon, and was a happy surprise to Nurse Watson, who was attending Mrs Thorburn.

We are glad to mention that Mrs H. M. Thorburn is improving nicely from her recent illness.

A young girl from Acme had the misfortune of breaking her arm in one of the races on Sports Day.

The Baseball game which took place on Sports Day between Rosebud and Rockyford was attended by a large crowd. Up till the 6th inning, the enthusiasm seem to be top high, but after that Rosebud took the lead and defeated Rockyford by a score of 19 to 6.

### To The Public

I, Leslie Racine, hereby wish to apologize for a certain statement made by me and circulated in this district concerning Mr Kelly, formerly of Carbon, and that the said statement was absolutely false, and I had no grounds whatsoever for making the same, and infringing on Mr Keller's character. And any party repeating or carrying this further, do so at their own risk, and directly insulting Mr Keller.

(Signed)  
LESLIE RACINE

## Stop the Wasted Effort

Compared with most countries, Canada has been free from serious industrial disturbances resulting in strikes and lockouts. In this respect, indeed, the Dominion has been most fortunate, and it is not only a matter for national congratulation, but it speaks well for the sanity, common-sense and general goodwill prevailing in this country, and an indication of the fair-mindedness of both employer and employee.

Recently, however, the printers of Regina went on strike to enforce compliance with certain demands made by them and which the employing printers felt constrained to refuse in view of present business conditions and the steady decrease in living costs now taking place. Among the demands made by the journeymen printers was that a 44-hour week should be adopted but that the old scale of pay for 48 hours work should be continued. Other demands were for the adoption of certain restrictive shop rules which would have the effect of decreasing production.

One such rule was a further extension of a very vicious rule already in force—a rule which, while not benefitting the worker, imposes a burden of expense, not on the employers, but on the general public. It is a rule which makes a demand for the doing of positive and absolutely waste work. To explain: If a merchant inserts an advertisement in a paper and at the same time orders, say 500 or 1,000 copies run off as a poster, the Union rules prohibit the use of the same type for the double purpose. In other words, the identical job has to be set up in type twice, whereas once would, and should, suffice. Thus double cost is entailed, and the public have to pay for it. The Union is laboring under the crazy delusion that they are thereby creating work for printers and providing employment for a larger number of men. They forget that as the workers constitute the great bulk of the buying public they themselves are forced to pay for this waste.

As a matter of fact they are not creating more work and providing more employment; indeed experience has proven they are restricting both work and employment, because by reason of the increased and unnecessary cost of work there is less done.

Any process of labor which does not produce something of value is economic waste, pure and simple. The production of something for use is the only way to increase wealth, and it is only through the increase of wealth that more employment can be provided. That is to say, wealth is production. There may be prospective wealth, enormous potential wealth, in the soil, in the mines, in the forests, and in many latent forms, but such wealth is not worth so much as a brass farthing to the people of the world until labor is brought to bear and this natural wealth is converted into the things men require. And if men's energies are devoted to work which produces nothing they need, which is work merely to make work and serves no good purpose, then the sources of wealth are not increased but decreased. The whole world suffers, but most of all the workers themselves.

The workers of the world need to learn the lesson that the first requisite for the payment of the good wages they demand, and have a right to receive, is that the employers make enough money to be able to pay good wages. Wealth, let it be repeated, cannot be distributed until it is created, and whatever interferes with the creation of wealth interferes with the distribution of wealth in wages as well as in profits. When Union rules interfere with the creation of wealth they interfere with the welfare of labor as much as they interfere with the welfare of capital.

As a matter of fact, they interfere with the welfare of labor a great deal more than they interfere with the welfare of capital, because about ninety per cent. of the wealth created is distributed in wages, and capital is well content with anything like ten per cent. of the wealth created.

It should, therefore, be the intelligent purpose of the labor unions to meet any depressed situation in business by increasing productivity and profits. Whenever labor, by restrictive rules, or capital by curtailing production, interferes with the material creation of wealth, it interferes with the material development of the race and with the common possession of the advantages of modern productivity as far as each restrictive act is operative.

There are, says an American writer, two fundamental facts to be recognized: First, that productivity is necessary for permanently high wages; and, second, that high wages are essential to general prosperity. The less the productivity, the less there is to be distributed in profits and wages. That is reasonably obvious.

And since the vast majority of the people of this or any other country are wage-earners, and general prosperity depends upon the prosperity of the mass, it is equally obvious that only liberal wages will create general prosperity and the general purchasing power, which, in turn, means the prosperity of every individual and of every individual business.

Therefore, let there be good wages paid for good work, and let good work—really productive work—be given good wages.

### Egg-Shaped Arctic Ship.

D. B. Macmillan, chief lieutenant of the Peary North Pole expedition, hopes to sail round Baffin's land in a 115-ton egg-shaped craft just launched in New York. The explorer hopes that, by reason of her shape, she will be lifted out of the water by ice pressure and carried along with the pack. She will burn whale oil as supplementary fuel.

### An Inch Of Rain

Weather Man Figures It Is 110 Tons Per Acre.

What is an inch of rain? The weather man has instruments for very accurate measurements of it, just as he measures the snowfall, the sunshine and the direction and velocity of the wind, to say nothing of the rise and fall of the temperature. An acre is composed of 6,272,640 square inches, and if there was an inch of water on it that would amount to 6,272,640 cubic inches. There are 227 cubic inches in a gallon, so that 6,272,640 cubic inches equals 22,000 gallons, and that much water would weigh 220,000 pounds, or 110 tons. It figures out, then, that an inch of rain falling is at the rate of 110 tons per acre. It is a good thing the tonnage is scattered over so much territory.

Minard's Liniment used by Physicians

### A Large Catch Of Halibut.

During the first two weeks of May, approximately one million eight hundred thousand pounds of halibut were caught on the fishing banks of British Columbia coast. Of this catch all but two hundred thousand pounds entered Prince Rupert.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

## Testing Soil For Acidity

Has To Be Done Carefully To Be Reliable.

There are several simple tests for soil acidity used, but they are generally not reliable unless done very carefully.

The surest test of all is a plot test. Sow a strip of alfalfa and divide it into three plots.

On plot one, apply no lime.

On plot two, apply one ton of lime per acre.

On plot three, apply two tons of lime per acre.

If alfalfa does well on all three plots, no lime is needed. If it fails or does poorly on one lime plot but does well on the other two, lime is needed. If it does better on the plot receiving two tons per acre, a heavy application is needed. The most common forms of lime are finely ground limestone, slaked lime, or marl. The plots used may be small if necessary so only a small amount of lime will be needed to make the test.

## A SMILE IN EVERY DOSE OF BABY'S OWN TABLETS

Baby's Own Tablets are a regular joy given to the little ones—they never fail to make the cross baby happy. When baby is cross and fretful the mother may be sure something is the matter for it is not baby's nature to be cross unless he is ailing. Mothers, if your baby is cross; if he cries a great deal and needs your constant attention day and night, give him a dose of Baby's Own Tablets. They are a mild but thorough laxative which will quickly regulate the bowels and stomach and thus relieve constipation and indigestion, colds and simple fevers and make baby happy—there surely is a smile in every dose of the Tablets. Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A colored preacher took some converts to a Louisiana river to baptize them. Seeing some alligators, one of them objected.

"Why, brother," urged the pastor, "can't you trust the Lord? He took care of Jonah, didn't he?"

"Ya-as, but a whale is different, he's got memory; but if one of dem 'gaters was to swallow me he'd jis' go to sleep in the sun there an' forgit all about me."

## Pain In The Loins Driven Out Quickly

That dragging, wearying sort of pain makes life a misery to many people. This pain is due to a passive inflammation of the adjacent tissue. Because every drop rubs in, because it penetrates so deep. Nervilleine gives a wonderful result. More powerful because five times stronger, more penetrating because it strikes through soft tissue, more healing to pain, Nervilleine Liniment should be always on hand. Sold everywhere in large 35 cent bottles.

No matter how costly a thing may be, a woman considers it valueless when she has lost all interest in it.

An Oil For All Men.—The sailor, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and those taken on a journey.

The man who doesn't recognize the world's greatness or his own littleness is likely to be a cynic.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Even when the unexpected happens there is always someone who says: "I told you so."

Ask for Minard's and take no other.

Spend your money at home, thereby helping your own town and local merchants.

**MURINE** Night and Morning. Have Clean, Healthy Eyes. Itchy, Tired, Red, Smart or Burn, If Sore, Irritated, Inflamed or Granulated, use Murine often. Soothes, Refreshes. Safe for Infant or Adult. At all Druggists and Opticians. Write for Free Eye Book. Murine Eye Remedy Co., Chicago.

## Hamilton Woman Was Actually Afraid To Go Out On Streets Alone

"Tanlac has relieved me of my suffering and I just can't praise it enough," said Mrs. Margaret Beverage, 305 Hughson St., North, Hamilton, Ont.

"For two years my appetite was very poor and I suffered a great deal from formation of gas on my stomach. I was also troubled with frequent attacks of dizziness and was actually afraid to go out or even get away from something to hold on to. One of these dizzy spells came on while I was calling on one of my grand children one day and I just fell right down on the lawn. Last spring, when I started taking Tanlac, I had

been confined to my bed for a month and was so weak I could not walk.

"Tanlac helped me from the very start, as I have not had a weak spell since I started taking it and I feel so good I can hardly realize that I am the same woman. The dizzy spells are gone, my appetite is fine and everything I eat agrees with me perfectly. I have recommended Tanlac to any number of my friends and, I am glad to say, it has benefited them all. I just wish I could tell everybody who suffers as I did what Tanlac did for me."

Tanlac is sold by leading druggists everywhere.

## Champion Aviatrix Killed

Flying at Altitude of 1,000 Feet When Plane Gives Way.

Miss Laura Bromwell, holder of the loop-the-loop record for women and one of the best known women pilots in the world, was killed at Mitchell Field, Mineola, N.Y.

Miss Bromwell was flying at an altitude of about 1,000 feet when the accident happened. She had just completed one loop and was about to make a second when something went wrong with the plane and it crashed to the ground.

Miss Bromwell, whose home was in Cincinnati, was 23 years old. She established her loop-the-loop record on May 15 last when she executed 199 loops in an hour and twenty minutes. That same afternoon she piloted an airplane over a two mile straight-away course at the rate of 135 miles an hour.

The machine in which Miss Bromwell was flying was equipped with a Curtis motor and was manufactured in Canada. It was of the so-called Canadian J.N. 4 type.

### Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the system, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work. All Druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

### Increase in Immigration

Greatest Number Entering Canada Are From British Isles.

During the month of March, 1921, a total of 11,009 immigrants entered Canada, of whom 4,865 were British, 4,292 from the United States, and 1,852 from other countries. The total immigration for the fiscal year ending March 31st is 148,477, 74,265 being from the British Isles, 48,059 from the United States and 26,153 from other countries. This is an increase of 27 per cent. over the previous fiscal year.

### New Fuel Corporation In B.C.

The Canadian Western Fuel Company which operate the coal mines at Nanaimo, Vancouver Island, has been re-organized as a \$5,000,000 corporation, and will be known as the Western Fuel Corporation of Canada, Limited.

## Don't Neglect Your Skin

Ladies—A few days' treatment with CARTER'S LITTLE LIVER PILLS will do more to clean up the skin than all the beauty treatments in creation. An imperfect complexion is caused by a sluggish liver.

Millions of people, old, young and middle aged, take them for Biliousness, Dizziness, Sick Headache, Upset Stomach and for Sallow, Pimply and Blotchy Skin. They end the misery of Constipation.

Small Pill—Small Dose—Small Price

## ASPIRIN

In every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (registered in Canada), of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

## MONTH OLD BABY HAD SKIN TROUBLE

On Face and Hands. Itched and Burned. Cuticura Heals.

"My baby was only a month old when her face and hands started to get red and scaly. The eczema started in the form of water blisters and itched and burned. She was so cross and fretful she could not sleep."

"This lasted nine months when I tried Cuticura Soap and Ointment, and I used three cakes of Soap with two boxes of Ointment when she was healed." (Signed) Mrs. Oscar Pilon, Amherstburg, Ontario, May 7, 1913.

Cuticura Soap, Ointment and Talcum are all you need for all toilet uses. Bathe with Soap, soothe with Ointment, dust with Talcum.

Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: Lyman, Limited, St. Paul St., Montreal.

### NOTICE TO THE PUBLIC

It has been reported to us by Mr.  
 Williams, Inspector of the Health De-  
 partment of Edmonton, that the  
 Streets and Lanes within the Village  
 of Carbon in general are in very bad  
 condition.

It is strictly prohibited for any per-  
 son or persons to deposit any refuse  
 of any description or manure on any  
 Street or other public highway. The  
 present accumulation must be cleaned  
 up immediately and any person or  
 persons found guilty of violating this  
 order hereafter is liable to prosecu-  
 tion according to law.

**R. SHIELDS,**  
 Reeve.  
**ALEX. REID,**  
 Sec.-Treasurer.

### NOTICE TO THE PUBLIC

The Sanitary Inspector has just  
 made an Official visit and reports  
 the Village in a very unsanitary con-  
 dition owing to carelessness of Busi-  
 ness Places and Householders, throw-  
 ing refuse all over the Lanes and Pub-  
 lic Places, and allowing refuse to  
 gather around their back yards, the  
 Village Council have decided to clean  
 up all unoccupied places, but expect  
 the residents will do likewise and  
 clean up also. The Inspector has  
 very leniently dealt with the public  
 during his inspection here, who wishes  
 to give every one a chance to clean  
 up as requested by the Council, but  
 intends to make another visit in the  
 near future and all parties found  
 guilty of neglect in not keeping their  
 premises in a clean state hereafter  
 will be prosecuted according to law.

**R. SHIELDS,**  
 Reeve.  
**ALEX. REID,**  
 Sec.-Treasurer.

## Distress In The Throat Caused Great Anxiety

Not an uncommon experience was that of Mrs. H. S. Wilmet, of Shulee, N.S.: "Many remedies failed, still splendid results were found in 'Catarrhazone.' I have been a most dreadful sufferer from Bronchial trouble and Catarrh. Oh damp days, I would hawk and suffer great distress in my throat. I used all kinds of medicine but didn't get permanent relief till I had Catarrhazone. It strengthened my throat, stopped my cough, and made me well." Try Catarrhazone yourself, see what wonders it works on a bad throat, or colds, catarrh, bronchitis. Different from the old way, because you breathe Catarrhazone. Get the dollar outfit which includes the inhaler and lasts two months. Small size 50c. Dealers, The Catarrhazone Co., Montreal.

## Far Away Green Fields

By E. L.

Elizabeth had a hard day. It had been dismal and cold and the furnace had been giving trouble, and the babies had been cross, and as she looked discontentedly out at the snow-clad prairie, stretching away to the horizon, she made up her mind, as women sometimes will, that she and John and the babies should seek a warmer clime. What was the use of living in a place, so cold and miserable for such a great part of the year and where the women and children were of necessity cooped up in the house all the time, and where, chief aggravation, they had to spend so much money on coal. No wonder, she thought, that so many people left this God-forsaken spot and went away to British Columbia or the Southern States where in the sunlight and the flowers life must be worth while.

And while she undressed the babies, she still called them the babies although Harold was two and Winifred nearly four, ways and means of getting out of the cold prairie country passed continuously through her mind. Of course she knew she would miss her old friends, but then thought she, other people moved and they had to leave their friends and seemed quite contented in so doing. Elizabeth did not take into consideration the fact that she clung to her old ways and her old associations more than most people and forgot that the prettiest scene in the world was always more enjoyable to her if she could contemplate it surrounded by those she loved. No, like so many people who are guided mainly by impulse she did not go into the details at all. She decided that she hated this cold, hard snow bound country.

## SUFFERING OF YOUNG WOMEN

This Letter Tells How It May  
be Overcome—All Mothers  
Interested.

Toronto, Ont.—"I have suffered since I was a school girl with pain in my left side and witheramps, growing worse each year until I was all run down. I was so bad at times that I was unfit for work. I tried several doctors and patent medicines, but was only relieved for a short time. Some of the doctors wanted to perform an operation, but my father objected. Finally I learned through my mother of Lydia E. Pinkham's Vegetable Compound, and how thankful I am that I tried it. I am relieved from pain and cramps, and feel as if it has saved my life. You may use my letter to help other women as I am glad to recommend the medicine."—Mrs. H. A. GOODMAN, 14 Rockvale Ave., Toronto.

Those who are troubled as Mrs. Goodman was should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound. Those who need special advice may write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. These letters will be opened, read and answered by a woman and held in strict confidence.

W. N. U. 1372

and that she wanted to live where it was softer, more pleasant and beautiful. By the time she had kissed the babies "good-night" she had mentally persuaded her husband to give up his position, sell their home and, in fancy, she was sitting on the train with the children bound for the "sunny south."

As luck would have it John came home from the office somewhat dispirited. Everything had gone wrong there on that bitterly cold day; there had been misunderstandings with the office force, a scene with the boss, and an aggravating story of conscientious and unappreciated effort, so that when Elizabeth unfolded her plan to him of getting out and fleeing themselves away to a place which her fancy began to paint as a veritable Utopia, he lent a ready ear and said: "All right, I'll put the house in Green's hands tomorrow for sale and if we get our price, we'll get out. I'll write to some firms where I might get a job and tell that sucker," meaning his boss, "to get someone else to handle his old job!"

It all worked like a charm. They were able to sell their house at a splendid figure, more than they had hoped for, and just when they were rejoicing over this piece of good fortune John received a very pleasing reply to one of his letters of application, offering him a good position in a small town in one of the southern states. Elizabeth was delighted, and even when they sold their furniture hardly felt a qualm, so pleased did she imagine she was to get away from the snow and cold of the prairies. It was only when her friends began to look sad and when her mother shook her head sorrowfully that she felt any remorse, but she tried to cheer her mother up by saying: "Well, mother, if it's nice there, perhaps you could come too!" The old lady shook her head and remarked:

"I am getting too old to transplant now" Elizabeth. I came to this prairie country many and many a year ago from dear old Scotland which is beautiful enough, ye know, but I have gotten used to the ice and the snow and the wonder of the prairie with its golden grain in the summer after its travail of the winter months, and we have prospered here. Na, na, I wouldn't like to change again. The prairie with all her hardness has been a friend to me and mine and I'm thinkin' I'll be buried here."

Elizabeth knew the story of her parents' immigration to the prairie country, how they had come with nothing and how they had worked and striven and saved. For years there had seemed little reward for their efforts, but at last they came into their own and from poverty had gained comfort and a real competence in their later years, and for a moment a little doubt crept into her mind as to the wisdom of her plan and then she remembered a picture of the beautiful country to which they were going, which had been sent to her, and as she visioned the children, Harold and Winnie gambolling amidst the flowers and the roses, she banished all regrets.

When John and Elizabeth arrived in Maryland, the roses were in full bloom. The air was hot and the atmosphere somewhat heavy, but of this Elizabeth made no mention. She had determined to like her new surroundings. Then the little prairie bred children began to wilt in the heat and John looked paler and paler as the days went by. Elizabeth, though a sociable little soul enough among her own folks was shy and distant with strangers and the southern methods did not appeal to her harder notions and so she was left very much alone. She, Elizabeth, who had been the centre of her little community at home!

"Mamma," said Harold one sunlit day in July, when the bees hummed amidst the flowers, and the grapes hung heavy on the vines which climbed about the house, "My head aches and my tummy hurts, I would like to see my Gamma." The usually bright little fellow stretched himself quietly on the couch in the sitting room and Elizabeth felt a pang of dread as she looked at his heavy eyes and pale little face. He had never been sick at home. She glanced quickly at Winnie and thought the child seemed dull too. Was this to be the result of leaving her home and friends so that they might play in the sunshine? She

asked herself. Was she to lose either or both of her children? Her heart cried out in protest as she flew to the telephone and called a doctor.

Both the children were very very ill, and the doctor told Elizabeth and John that the climate did not agree with them. John, too, had an illness and Elizabeth felt herself drooping and languid, but she felt she dare not let herself go for the sake of the others and many were the anxious pleading prayers she prayed that they all might be spared to return home again. She was so tired and so lonely amidst all the beauty and languor of the south, and actually longed for the snow bound wintry streets of her own little prairie town and did not feel that she cared how much coal they had to burn, if only she could feel the invigorating frost bitten breezes again, which she felt put new life and vigor and ambition into people.

So John wrote to his old cranky "boss," and received a letter from him in reply which brought tears to both their eyes as Elizabeth and he read it. It said that they would be only too glad to have him back, and promised him an advancement in the very near future, and hinted, wisely, too, that for a young man there were no better opportunities than in the prairie country.

And six months from the time they left the little town they returned. They had spent a great deal of money and the babies had suffered much, but Elizabeth and John had learned a wonderful lesson regarding distant green fields which seem so beautiful in most of our lives, at some time or other, and which prove merely a mirage after all.

And they settled down to make the best of their lives on the prairie, with its cold, its snow and its hardness, for they had found that there were sufficient compensations to them to make up for the whole of the sunny south-land.

## You May Have Kidney Trouble and Not Know It!

If your back aches and you suffer from dragging pains, it is an evidence your kidneys may not be acting just right. What you need is a course with Dr. Hamilton's Pills. They contain both Mandrake and Butternut and act very beneficially upon the liver and kidneys. "I was bothered a great deal with my kidneys, but got quick relief from Dr. Hamilton's Pills. My trouble manifested itself by pain in the back and by constant headache. I quickly recovered after using a few boxes of Dr. Hamilton's Pills. They brought me health, strength and vigor." Sold everywhere, 25c, or The Catarrhazone Co., Montreal.

### Summer Storage of Coal.

On the subject of storage of domestic coal during the summer it has been usual in England when coal was stored without shelter, that a wall was built of coal blocks around the central pile, and a coat of whitewash applied over all; and that this had the effect of preserving the coal from the action of the weather.—Edmonton Bulletin.

The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

Children suffering from worms soon show the symptoms, and any mother can detect the presence of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health. Miller's Worm Powders are prompt and efficient, not only for the eradication of worms, but also as a toner up for children that are run down in consequence.

When poverty comes in at the door of an Eskimo house love doesn't fly out at the window. An Eskimo house has no windows.

Jealousy bears a lot of fruit that should not be preserved.

## Merchants Bank Officials Express Tempered Optimism Regarding Business Situation

President and General Manager Review the Canadian Business Situation With Much Hope—Financial Position of the Bank an Exceptionally Strong One—Crop Outlook Encouraging.

At the annual meeting of the Merchants Bank of Canada, the various reports which were presented showed that this institution occupies a commanding position in Canadian financial affairs. The addresses of the President, Sir Montagu Allan, and the General Manager, Mr. D. C. Macarow, were concise statements of present day conditions and contained an optimistic survey of the future. These reports showed that every department of the bank is in a most excellent condition, and would indicate that this bank is rapidly increasing the sphere of its influence in every avenue of trade and commerce at home and abroad.

### The President's Address.

Sir Montagu Allan in part said: "The general depression in business, felt to a greater or lesser degree in every country in the world, has affected the business of the bank to some extent, but we hope the low point of depression has been passed, and that there will soon be a change for the better. The coal strike in England which will no doubt result in the loss of a great deal of trade, and the unrest and discontent which seems to prevail in nearly all the countries of Europe, give rise to serious financial problems to be reckoned with, but no man in this country who is strong and healthy, can afford to be a pessimist for any length of time. The known and undeveloped resources are sufficient to ensure future prosperity."

### New Issue of Stock.

"As mentioned in last year's report a further issue of \$2,100,000 of new stock was made, making the paid-up capital of the bank \$10,500,000, and by the transfer of the premium on the new stock to the rest account, the rest now stands at \$9,450,000."

"The shareholders of the bank now number 2,997, as against 2,622 in 1920, being an increase of 375 during the year."

Current loans and discounts stand at \$109,183,000, as against \$113,198,000 last year. It will be seen, therefore, that this bank continues to extend its ample share of assistance to the industries of the country.

### General Manager is Optimistic.

Following the president's concise yet comprehensive review of the situation, as reflected in the year's statements, said Mr. Macarow, there is little left for me to add beyond, perhaps, a word or two by way of amplification.

It will be observed that in comparison with last year's figures our total

assets show a shrinkage of about \$7,000,000, or, roughly, 3½ per cent., which, in view of all the surrounding circumstances must be regarded as a satisfactory showing, the liquid position being well maintained the while.

The trend of our interest-bearing deposits for the same period has been steadily upward, an increase in that department of about \$7,000,000 being shown, but this gain has been more than offset by the decline in the total ordinary deposits. A year ago, however, under the heading of demand deposits, a sum of about \$8,000,000 stood to the credit of the Government in connection with Victory Loan payments. This amount, which, of course, was of a purely temporary nature, was withdrawn during the year so that, after making allowance for it, the total deposits and total assets about held their own, a satisfactory achievement we have no doubt you will agree.

### Crop Reports Are Promising.

Crop conditions throughout the country are at the present moment exceptionally promising. If I may say a word as to general conditions it will be one of tempered optimism, having a due comprehension of the many difficulties which require to be met but having, at the same time, a proper appreciation of the actual and potential riches of this country.

There are indications that the monetary position, broadly speaking, is less stringent and that the general liquidity of credit now in evidence is continuing to develop further.

Altogether, and in a word, it is not difficult to be an optimist as to the future of "Canada Unlimited," to borrow the apt expression recently used by an eminent Canadian.

The Board of Directors was re-elected, with Sir H. Montagu Allan as President, and F. Howard Wilson as Vice-President.

## Saskatchewan Offered German Airplane

Souvenir From Canada Air Board  
Could Be Used.

A German airplane, to be added to the Saskatchewan war souvenirs or to be available for flights, is the offer made by the Canada Air Board to the Saskatchewan branch of the Canadian Air Force Association.

The type of machine which would be donated has not been specified, but it is understood that it would be airworthy and not merely something to be put in a hangar and left "to be looked at." At present the only stumbling block to accepting the board's offer is the payment of the freight, estimated at about \$200.

## CLARK'S

### Kitchen at your Service again this Summer

## CLARK'S Tomato Soup is such a treat - -

Fine ripe tomatoes fresh from the fields give it their delicious flavour, and all you have to do is to heat and serve.

CLARK SOUPS are made in 13 different sorts, and include chicken.

Like all "Clark Good Things" the price is moderate.

Made from Canadian Farm Produce  
and sold everywhere in Canada.

## Strong Plea Is Made For Peace Of The World

President Harding Speaks of High Ideals of Canada and the United States, Following Address of Hon. N. W. Rowell.

Washington. — President Harding delivering a commencement address at the American University here, found the subject of world peace occupying so prominent a place on the programme that he was prompted to depart from his prepared manuscript and declare for the preservation of peace by sovereign states without the interference of a world "superpower."

The President's remarks followed an address by Hon. N. W. Rowell, of Canada, who suggested that the best contribution North America could make to civilization was "for men on this side of the water to stand behind the movement for peaceful settlement of international disputes."

"I do not think I could let the occasion pass," said the President, "without giving assent to many of the appropriate and appealing things just uttered by Mr. Rowell. I liked his expression that American and Canadian ideals are in common and when he spoke about the North American contribution to present day civilization and to the world, it occurred to me that the example of the two great people living side by side in peace, in

confidence and in mutual understanding, is about the finest contribution that two nations could give to the world.

"I have said on many occasions that if all the nations of the earth were as honest and unselfish as our republic, there never would be another war. I will revise it today and say that if all the nations of the earth are as unselfish and devoted to their ideals as the United States and Canada there never will be another war.

"But if I may say without a discordant note—for there is none in my heart—I call attention to the fact that the United States of America and the Dominion of Canada have dwelt side by side and settled their controversies satisfactorily without resort to a super-power, but by the exercise of the sovereignty of free peoples dealing with one another; if we can commit civilized humanity to abiding righteousness and everlasting justice and inspire them with our example, we will have made a long stride toward the peace the world craves."

## Working For Better Dairying

Percy E. Reed, Dairy Commissioner for Saskatchewan.

## Western Crop Conditions Continue Favorable

Winnipeg.—There has been another week of almost perfect weather conditions with rains very general over the whole of the three provinces. Insect damage in the shape of cutworms and grasshoppers is still spoken of in several points. The cutworm damage is confined largely to Alberta with one small outbreak reported from Western Saskatchewan. As regards the grasshopper menace, all provinces speak of the pests, but the same reports say that all interested parties are on the job of combatting them.

## Indians Sell Standing Timber

Redskins Will Become Wealthy Through Big Deal.

Superior, Wis. — Contracts with Chippewa Indians of the Net Lake, Minn., reservation have been signed by the Northwestern Paper Company of Colquet, Minn., whereby the company will pay them approximately \$500,000 for from 25,000,000 to 30,000,000 feet of sawed timber and pulpwood in the vicinity of Net Lake.

The deal marks the sale of the last large tract of standing timber in the Lake Superior district owned by Indians. Some of the Indians will receive as high as \$10,000 and \$15,000 for timber on an 80-acre allotment. From paupers, many of the redskins have become wealthy.

The Indians are among the most primitive in the north woods and what they will do with their newly acquired fortunes is causing Government agents much concern.

## Prevent Confiscation In Russia.

Riga.—A Moscow despatch announces that a decree is being prepared to prevent further confiscation of money from private persons, except by court trial. Another decree provides that anyone arrested must be given the reason for this within 24 hours and, if a member of a trade union, may be released if the union vouches for him.

## Admiral Sims' London Speech.

Washington. — Secretary of the Navy Denby has instructed Rear-Admiral Sims to advise the Navy Department immediately by cable as to whether he was correctly quoted in press accounts of an address he made to the English-speaking Union at a luncheon in London, June 7.

## Would Unseat De Valera

London.—Practical action has been instituted, says the Belfast correspondent of the Evening News with the view to making void the election of Eamonn de Valera, the Irish Republican leader, as a member of the new Ulster Parliament, on the ground that he is an alien. A leading firm of Belfast lawyers, according to the correspondent, has been engaged to investigate De Valera's antecedents and already steps are afoot for collection of evidence in the United States and elsewhere, especially from De Valera's speeches on the subject.

## True Bear Stories

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

(Continued)

Well he realized that if this shot was not a fatal one his chances were slim, still he went on with dauntless courage, though as he told me his heart beat a little faster than usual. At last he noted a huge dead spruce tree fallen across the track, and stopping and studying the situation he felt convinced that Mr. Bear was either concealed behind this or very close to it. Creeping up to within a few feet of the tree, full cocking his smooth bore gun, he broke a dry stick sharply and on the instant over the tree came the grizzly, mane bristling like an angry dog, mouth wide open with huge fangs exposed, growling savagely he charged right at Robert; he, waiting until the bear was so close the powder burnt his flesh, shot him right through the brain and killed him instantly. Robert camped beside his victim that night and carefully skinned him, but like so many of his kind the skin was in poor shape, scars and cuts from many fights, also traces of several old bullet wounds. He was very thin and, as Robert quaintly expressed himself, mighty hard chewing.

The inroad of the grizzly into our country caused much excitement amongst the Indians as their huge claws are much coveted by the young warriors as signs of their prowess in hunting. Old Kinistino, however, was the only one who had a necklace of these and it was exciting enough to hear him tell of his fights with them when on buffalo hunting and horse stealing excursions to the Great Plains.

In my own case there was food for thought as most of the winter on trips to Indians I was sleeping out and invariably alone, hardly ever carried fire arms and would certes have been an easy prey for a wandering grizzly.

It was the fifth night out after a trip on my homeward journey, with a game little mare named Nellie who was wise beyond description; I had a flat sled with a bulky load of furs; the weather was intensely cold, in February, I think, and I had selected a camping place somewhat earlier than usual; this in the middle of a small green poplar bluff, with a bunch of dry trees in the centre; near at hand was a dry hay-swamp well sheltered by scrub and timber and in this I tethered my pony to a green pole about the size of a fence rail, notching the centre slightly so that the tie would not slip; she could drag this about the swamp and keep herself warm by pawing the snow for the fresher grass underneath, but if she attempted to leave the swamp the pole would at once catch the trees.

About an hour's hard work gave me a camp; a nice little clearing with two large piles of wood on each side of the fire, wood cut to about five foot lengths and you can then stretch your length and enjoy the heat front and back, for in spite of severe cold you are bound to sweat more or less while travelling. Unloading the sleigh I piled the bales at the back, and this, with the snow shovelled (by snowshoe), made a break from any wind on three sides while the front was filled with a glorious fire. After a good supper and a final trip to my pony in which the tether was carefully inspected, also a quart of oats placed on the ground for her feed, I wished her goodnight, remarking at the time, "Well, Nellie, we have about forty-five miles to make tomorrow and we must start early if we intend reaching home. I think I will get up at half past two." She gave a wise little nicker and back to camp I went. My large fire had burnt down to glowing coals so I at once made up my bed and a description of this may interest readers.

The snow had been well cleaned off and on the ground I spread fine willows (there being no spruce), over this came a huge armful of hay cut with my sheath knife in the swamp, and there is nothing warmer to sleep on; on this my deer skin, killed late with the winter hair on and only scraped, not tanned as then it would be too soft and one would feel the lumps below; this is laid tail up so that you lay against the hair and do not slip off. For covering a 3½ point Hudsons Bay blanket, always white, as they are so much warmer than colored blankets, over this my

rabbit skin robe and over all my duck sled wrapper which protects the bedding from any stray sparks. The fire goes out, but no matter how low the thermometer goes down, and it must have been 40 below zero that night, one can sleep warm and comfortable.

Covering up my head as is customary and necessary when exposed to such low temperatures I was soon fast asleep, and after some hours sound repose I was awakened by a tug at my bedding. Was I dreaming? No, I could both feel and hear the animal moving. My thoughts flew back to the grizzly bear, the only weapon I had was a light axe and for the life of me I could not recollect just where I had placed this over night. Well, I was up against it and could either feel or imagine the hot breath of the brute, so summoning up all my resolution I threw the bedding back and here was Nellie's wise little head within a foot of my own. Such a relief. Looking at my watch it was twenty minutes to three, so I at once rose with the blankets gracefully draped round me and made on a huge fire. My, but the little mare did enjoy it as I stripped her blanket off, it being covered with frost, and she, carefully stepping, would turn first one side and then the other to the heat. I found on examination that she was fast tethered to the pole and wondered how she could have dragged it in through the narrow path I had cut to the swamp. On looking at the tracks I decided that when the pole would catch she had nosed it straight again and continued doing this until her line allowed her to reach my camp. At breakfast, which I always shared with her, she being very fond of both bread and sugar, I made a promise, and it was that I would never part with her, and when she got beyond work she would be pensioned off. This in due time happened and she passed a serene old age surrounded by her off-spring, some of whom can be seen driving into Melfort today, handsome enough, but I doubt if any could show the same lion like courage and hardness which little Nellie proved on many a long trip.

## African Demands British Justice

Chief Asks Privy Council For Ownership Rights to Land.

London.—A West African chief attended in state, the meeting of the Privy Council, and asserted his rights of ownership to 250 acres of land in Lagos, taken by the Colonial Government there for public purposes. His private secretary carried a staff sent by the Prince of Lagos to identify the appellant. On this staff was an inscription certifying that it had been presented to the prince's grandfather by the British Government as a token of appreciation of assistance rendered the British in suppressing the slave trade and protecting missionaries.

The appeal of the chief was adjourned.

## German Bank Prosperous

Large Financial Institution of Berlin Increases Capital.

Berlin.—Announcement of a capital increase of 90,000,000 marks is made by the Dresdner Bank, one of Greater Berlin's largest financial institutions. This makes the capital of the bank 330,000,000 marks. The bank endorsed the \$200,000,000 worth of treasury notes recently turned over to the allied reparations commission.

## Devonshire Leaves In July.

Ottawa.—It has been officially announced from Government House, that their Excellencies, the Duke and Duchess of Devonshire will sail from Quebec for England on July 19, on the Empress of France.

## Kansas Harvests Wheat.

Pratt, Kan.—Wheat harvesting will begin in some sections of Pratt county the latter part of this week and will be in full swing by the middle of next week.

## Mutiny of Chinese Troops

Attempt to Check Opium Smuggling Caused Uprising.

Hankow, China.—Mutinous Chinese troops have looted and partially burned Ichang, a treaty port 156 miles northwest of here, for the second time in six months, according to official reports reaching Hankow.

British, United States and Japanese gunboats have been despatched to Ichang.

Consular reports indicate that attempts to check troops in reported opium smuggling operations caused the uprising.

Casualties have not been determined, but are expected to exceed those of the November mutiny at Ichang when sixty were killed and two million dollars in property destroyed.

## Chemist Says He Can Make Gold

Has Also Solved Problem of Making Other Metals.

New York.—Dr. Charles Benson Davis, of this city, in a paper which he has just submitted to Engineering Foundation, claims to have solved the problem of manufacturing gold. He declares he has already successfully demonstrated the possibility of making gold and other chemical elements, such as silver, platinum and copper, by transmutation of a common element. He has shown samples of the metals he claims to have made to members of the Engineering Foundation and has requested that body to investigate his claims and his methods.

## Anti-Cigarette Law In Utah.

Salt Lake City, Utah.—Utah's anti-cigarette law, passed by the last Legislature, is now effective. Simultaneously the shelves of tobacco stores were cleared of cigarettes, and there were no advertisements in the newspapers of cigarettes. The law provides against smoking in public places, which are defined and prohibits the giving away, sale, exchange or barter of cigarettes.

## Retalitory Duty On Lumber.

Washington.—The ways and means committee of the House decided to include in the Permanent Tariff Bill a duty on lumber similar to that imposed by Canada upon lumber sent to the Dominion from the United States. This is 25 per cent. The proposal was bitterly opposed by several of the committee members and it was adopted only after a lengthy fight.

## Silver Strike in B.C.

Prince Rupert, B.C.—An important silver strike is reported on the "Gabriel Group" in the Skeena Valley, up the Copper River. The property is owned by D. Buchanan, a Montana man.

## The Coal Shortage in Britain

To Meet Situation National Kitchen Sold Hot Water to the Working People.

Hull, Eng.—The shortage of coal has been so serious here during the strike of miners that the people were unable to obtain hot water. To meet this situation, the National Kitchen, which happened to have a supply of coal, sold hot water to the working people at one-half penny a bucket.

The shortage of coal also produced a shortage of ice as it handicapped the artificial ice plants. To obviate this, trawlers were sent to Holland to bring coal which they exchanged here for ice.

## Immigrants Barred

German, Austrian and Turk Tourists Can Enter Canada.

Ottawa.—The Department of Immigration and Colonization says that tourists do not require passports as a condition of entry from Canada to the U.S. or for the return journey.

Immigrants coming to Canada to work or reside from Germany, Austria, Hungary, Bulgaria or Turkey, are debarred. The ban does not apply to persons coming to Canada from these countries when belonging to the non-immigrant classes.

## To Foster Cotton Growing

Grant For Industry Within the Empire Is To Be Increased.

Manchester, Eng.—Winston Spencer Churchill, colonial secretary, addressing the British Cotton Growing Association, announced that it was the Government's intention to devote £1,000,000 to foster cotton growing in the British Empire instead of £50,000 yearly for five years, as formerly promised.

Mr. Churchill said that although much had been achieved in cotton growing in the Empire, it little compared with what might be done. Referring to Egyptian cotton, he declared it to be superior in quality, and only second in quantity to that obtained from the United States.

## Prices Must Come Down.

New York.—Prices in the United States must either come down or those in Europe must go up to meet them if the economic situation in this country is to be settled, Mark Sheldon, Australian commissioner to the U.S. declared at a farewell dinner given him by a session of foreign press correspondents. Until this adjustment has taken place, he said, there could be no resumption of the enormous prosperity the U.S. has enjoyed.

## Marconi Visualizes Results Of Wireless Control On Future Naval Warfare

"The country with the most efficient directional wireless is bound to win the next war. The rapidity with which experiments are succeeding in England in this phase of wireless control will surely result in a revolution in modern ideas of naval warfare.

"I had in mind a gigantic clash between two manless navies in mid-ocean, directed by unseen hands on the land or in the air.

"The most efficiently directed navy is bound to drive the weaker navy from the seas and then the seaboard and bases of the latter will be entirely at the mercy of the strongest."

Thus Senator Guglielmo Marconi, who has just returned from a two months cruise in the Mediterranean on his yacht *Electra*, summed up the possibilities of this newest arm of the marvellous wireless achievements.

"The possibilities along the line are so great that even I am afraid to say too much. No one knows its limit. Already scientists stand aghast at what the future may bring. Experiments in England in directional wireless are already successful in the embryonic stages, and are being so improved and becoming so much more efficient that daily there are new surprises.

"I understand that America is so impressed that the greater part of the summer naval manoeuvres will be devoted to furthering its knowledge of this most important development by using obsolete dreadnoughts directed by wireless as targets for attacks from the air.

"It can readily be seen that if one ship can be controlled in this manner the future manless navies are simply a matter of time and development.

"If a war ever comes when this is perfected it will be more terrible than ever."

Marconi visualized monster manless battleships patrolling seas, controlled by master admirals speeding through space four or five thousand feet in the air. His description of what would happen if two of these navies of equal size should meet, automatically discharging their batteries of torpedoes, outdoes Jules Verne and H. G. Wells.

Now that the position of a ship even two or three thousand miles distant is easily ascertainable by land wireless stations," Marconi explained the possible use of a gigantic super-torpedo, bigger than the largest submarine, with a radius of three thousand miles and containing tons of explosive.

"It will be easy to discharge this monster weapon from land and direct it through the ocean until a target is found. It would be worth while wasting many of these if one succeeded in destroying an enemy dreadnought," said Senator Marconi.

The inventor characterized the whole field of wireless research as a fertile field for horrible development, saying:

"At every stage of progress we are finding new and unexpected possibilities, such, for instance, as the firing of batteries of guns on land and sea by wireless waves.

"Of course, every evil possibility directs counter-measures and the mysterious electric force in the air may be harnessed by defensive as well as offensive purposes in war time."

### Paying a High Price.

France is to offer a hundred million dollars in the United States to pay off maturing debts and provide money for the purchase of foodstuffs and raw materials. The rate of interest promised is 7 1/4 per cent, and as the issue will be made at the rate of \$95 per \$100, the return will be about 8 per cent. France must need the money when it proposes such terms.—Winnipeg Free Press.

### Riel's Brother Dies.

Joseph Riel, brother of Louis Riel, the leader of the Northwest Rebellion, died recently in Winnipeg. Joseph Riel was 63 years old and at the time of the revolts led by his elder brother, who was executed at Regina in 1887, was a boy following the camps of the ill-fated Louis.

W. N. U. 1372

## Canada's Healthy Livestock

Report of Last Two Years Is Highly Satisfactory.

The report of the Veterinary Director-General recently issued covers two years, the first part for the year ending March 31, 1919, and the second part for the year ending March 31, 1920. The health of Canada's livestock during both years is shown to have been highly satisfactory. In fact it is easy to believe that Canada is the healthiest country in the world for all breeds of livestock. No country can claim to be absolutely free from ailments in its cattle, horses, sheep and swine any more than it can that every human being is health-perfect. But Canada, it is safe to assert, comes nearer to the ideal state than any other land. None of the epizootic diseases that cause most anxiety to sanitary officials, such as foot and mouth diseases, cattle plague and contagious pleuro-pneumonia, are found within our borders. Diseases that do exist to a very limited extent, such as glanders, hog cholera, and cattle mange, the report shows are being kept well under control and are diminishing in number year by year. Glanders is proven to have existed only in Northern Saskatchewan and Manitoba and in those provinces extremely few cases are reported. All the outbreaks, the Veterinary Director-General is able to state, have been efficiently dealt with and the disease eradicated. Where hog cholera and cattle mange have appeared vigorous action has immediately been taken with the result that contagion has been everywhere checked and districts entirely cleared. Regarding hog cholera, experience shows that nearly all cases originate on premises where garbage is fed to the animals. Cooking, if properly done, is stated to be an effectual safeguard. Full statistics are given in the report of the activities undertaken all over the country which indicate the remarkable results achieved. A marked increase is shown in the number of livestock inspected for exportation in the year 1919-20 compared with the previous year, the figures being 340,000 as compared with 100,000.

## Nitrate Sold To Farmers

Will Be Used to Increase Fertility of U.S. Farming Soil.

More than 100,000 tons of nitrate, originally produced to help in blowing the German armies off the map of Belgium and France, this year will be put to the more peaceful work of increasing the fertility of United States farming soil. After the signing of the armistice the War Department released to the United States Department of Agriculture 110,000 tons of nitrate at a salvage price.

To this quantity is added 40,000 tons received from Chile by the Department of Agriculture too late for distribution last year, so that 151,000 tons will be sold by the Department of Agriculture to farmers under the authority of the Food Control Act, which provided for its purchase and sale by the government to farmers at cost.

## Good Coal In Upper Skeena Field

Chairman of B.C. Company Advocates Building Railway.

In giving evidence before the Fuel Commission at Ottawa, Mr. J. G. Scott, chairman of the British Columbia Skeena Coal Company, stated that the coal field, situated on the Upper Skeena, had a total area of about 1,200 square miles; that the quality of the coal is anthracite and semi-anthracite; the estimated quantity to exist on the 47 miles controlled by his company is very large, and that the building of 150 or 180 miles of railway would give this valuable deposit an outlet to the Prince Rupert, Victoria and Vancouver markets.

Patronize your local merchant and thereby help to build up your home town and community.

## Prominent Railway Official

Charles Murphy, General Manager, Canadian Pacific Railway Company, Western Lines.

## Blind Soldier May Become Famous

Work of Untrained Artist Wins Place In Paris Salon.

Exhibit No. 3514 at the salon of French artists in the Grand Palais is a small statue of a French poilu leaning on his rifle. It was submitted by one Bernard Fedot, with thousands of other statues, in competition for a place in the salon and the award to Fedot was made by judges who had no knowledge of the sculptor.

It now becomes known that Bernard Fedot is an ex-poilu who was blinded by a German shell which tore away half his face. Invalided back to his home in Lachapelle Vielle Forest, in the department of Yonne, a peasant, who had had no dealings with earth before except with a spade, set to work without a teacher to learn to model figures, using earth from the garden he used to tend when he could see, and after three years he exhibits in the National salon.

The announcement has drawn great attention to the statue, and before long it is probable that Fedot will find himself the possessor of ample means to carry on his work.

## A Northern Niagara

Few Have Heard of Twin Falls On Hay River.

With the rush into the hinterland of Northern Canada, due to the oil finds, beauty spots of the Far North are being discovered and exploited. A recent issue of The Edmonton Journal, tells of twin falls on the Hay River, just beyond the top of Alberta, which rival Niagara in beauty and magnificence. Few people in Canada have ever heard of these falls. They were first seen by Bishop Bompas in 1872, who named them in honor of the then Princess of Wales, Alexandra Falls.

The time will not be many years distant, with better transportation facilities, when the northern hinterland will be one of the chief tourist attractions on the continent.

## Successful British Tractors

Show Remarkable Hauling Power In Trial In Far East.

The merits of the British-made tractor for agricultural purposes were conclusively demonstrated during a trial on a rubber estate in the Far East. All conditions were against success. The soil consisted of heavy sand or of sand mixed with clay, and rain had fallen heavily prior to the trial. Nevertheless, the driver was able to turn and manoeuvre with the greatest ease. Further, the tractor showed its hauling powers by pulling two large trucks, weighing about 11 tons, up hill.

## Easier to Smile Than Frown.

Philosophy and science are combined in a notice stuck on the notice board of a London church which runs: It is easier to smile than to frown! To frown you use 64 muscles, but only 13 to smile!

A town cannot grow without business. By helping your local dealer you assist the community.

## Chinese Government Forbids German Firms To Carry On Business

### Irrigationists to Meet

Fifteenth Annual Convention of Western Canada Irrigation Association.

Some of the leading agricultural and irrigation authorities on the continent will address the Fifteenth Annual Convention of the Western Canada Irrigation Association at Vernon, British Columbia, July 27th, 28th, 29th and 30th. They include the Hon. S. F. Tolmie, Minister of Agriculture for the Dominion Government; the Hon. Duncan Marshall, Minister of Agriculture for Alberta; the Hon. T. D. Pattullo, Minister of Lands, British Columbia; Doctor John A. Widtsoe, President of the University of Utah, and one of the leading authorities in the United States on practical irrigation farming; Doctor F. A. Wyatt, Professor of Soils at the University of Alberta; L. C. Charlesworth, Chairman of the Alberta Irrigation Council; R. H. Helmer, Superintendent of the Dominion Experimental Farm at Summerland, British Columbia; C. I. Lewis, of Oregon; Lionel Stevenson, Superintendent of the Dominion Experimental Farm at Sydney, Vancouver Island; A. S. Dawson, Chief Engineer of the Canadian Pacific Railway's irrigation systems; and Doctor Samuel Fortier, Chief of the Irrigation Division of the United States Department of Agriculture.

Subjects of the greatest importance to irrigators will be discussed, including Excessive Irrigation and Its Dangers, on which Doctor John A. Widtsoe will give an address. Doctor Widtsoe says that this is a question to which they have given considerable attention during the last few years in Utah, and they have arrived at very satisfactory conclusions as to the right amount of water to be used with the various crops to get the best results from irrigation. Lionel Stevenson, B.S.A., who has had considerable experience with overhead irrigation on the Dominion Experimental Farm at Sydney, British Columbia, will give a talk on this subject. The Action of Water on Soils will be the subject of Doctor Wyatt's address. This should be a very instructive address for Doctor Wyatt is one of the foremost authorities on soils in the country, and he has the knack of presenting his subject in a very interesting manner.

## Mummy Brings Bad Luck

Whoever Looks at "Lady of Egypt" Invites Trouble.

The British Museum possesses a "Lady of Egypt" with a history. Mrs. Amen-Ra, more properly called "The Lady of the College of Amen-Ra," is the famous "unlucky mummy" in the museum. It is said that whoever looks on her will be pursued by misfortune and often meet speedy death. Superstitious persons, carefully avoiding the Egyptian rooms at the museum, tell many stories of the misfortunes that have come upon those who looked into the mummy's face. During the winter the gallery where the mummy is placed was closed to the public and was used only by the registrar of Friendly Societies. Now the public is again admitted and many daring Londoners have gone there for the thrill of risking the ancient lady's magic.

## Facts About the Mounties

Last Year Force Consisted of 1,671 Men of all Ranks.

Last year the Royal Canadian Mounted Police consisted of 1,671 men of all ranks, having 942 horses and 113 dogs.

They maintained 11 Divisional Posts, and were divided into 127 Detachments of which 97 were in the four western provinces extending from the Upper Great Lakes to the Pacific Coast.

During the year the force purchased 207 horses at an average cost of \$144. Forty of these horses were purchased in Ontario, 4 in Manitoba, 40 in Saskatchewan, 102 in Alberta, and 21 in British Columbia.

China and Germany are apparently no closer to an actual restoration of diplomatic relations than they were six months ago, in spite of the fact that unofficial delegations are at work in both countries trying to perfect a treaty.

Herr von Borch heads the German delegation which is working in Peking and Dr. Chang is chairman of the Chinese delegation which is living at the Chinese legation in Berlin.

Although China passed a resolution declaring it was at peace with Germany, following the refusal of the Chinese to sign the Versailles Treaty because of the disposition made of Shantung province, the Chinese Government has not yet abrogated its legislation forbidding Germans to carry on business in China.

Consequently, German firms are unable to conduct business with the Chinese in the name of German citizens. While the Chinese war legislation is not rigidly enforced, it still stands on the Chinese statute books, and German trade is not regarded as safe until there is some written agreement between China and Germany which will prevent legal complications.

It now seems unlikely that China will sign a treaty with Germany until the United States devises some plan of restoring diplomatic relations with Germany. China followed America's lead in breaking off diplomatic relation with Germany and did not enter the war against the Central Powers until the United States had done so.

When China entered the war it was as an associated power, and not as an allied power of the Entente. And now it stands with the United States as non-signatory to the Versailles Treaty and critical of the provisions of that treaty. China is a member of the League of Nations, however, having gained admission to that body by signing the Austrian Treaty.

Theoretically, China is at peace with Germany. It has so declared itself by legal enactment. But all the legal steps necessary for the restoration of diplomatic relations must be taken before peaceful relations and commercial interchanges are possible.

China and Germany have not exchanged ministers and consuls. Dr. Chang has the same uncertain position in Berlin that Ellis Loring Dresel, the American Commissioner, holds. Both the Chinese and American representatives are in Germany merely through the courtesy of the German Government. And Dr. Borch is in Peking merely as a recognized negotiator without any diplomatic rights or privileges.

## The Way To Reduce Expense

Study Farming And Have Only the Best Equipment.

1. To have good fences.
2. To have good seed of all kinds.
3. To have good stock of all kinds.
4. To have all modern machinery so that less men can do more work in the smallest amount of time.
5. By having good ground so a high yield can be obtained, to get as much off one acre as off two.
6. By having everything in good repair when going to work.
7. By organization so as to cut down the cost of getting to market.
8. By rotation farming and by dairying.
9. By studying farming as you would any other business.
10. By using your head as well as your hands, to see where you made your mistake, by keeping account of everything and by reading good papers.—J. A. H.

## Chinese Presents For France.

Bringing with him three wagon-loads of presents for the French Government, Mr. Chu Chi Chien, Chinese special envoy, arrived in Paris recently. Among the presents offered by China to France and especially intended for Paris universities is a magnificent piece of embroidery 3,000 years old.

## World Happenings Briefly Told

The Bavarian Einwohnerwehr, or Citizens' Guard, has decided to disarm voluntarily by June 30, under the terms of the Allied ultimatum.

Mr. Lloyd-George has been ordered by his physicians to take a complete rest. He is suffering as a result of a severe chill from overwork and has cancelled all his engagements.

Lord Byng, Canada's newly appointed Governor-General will officially open the Canadian National Exhibition in Toronto on August 27 next.

Peace River is wildly excited over a gold rush and several parties are "grubbing" up for a trip to a new find the exact location of which is not known.

Belfast's stately city hall was gaily beflagged for the opening of the northern parliament, which will be only surpassed in brilliance of ceremony by the state opening which has been fixed for June 22.

Sir Hamar Greenwood, chief secretary for Ireland, replying to an inquiry in the House of Commons as to the number of soldiers killed or wounded in the "war in Ireland" since January, 1920, said that 127 had been killed and 268 wounded.

In the Sudbury police court a settler was sentenced to one month in jail with hard labor for setting a fire which eventually destroyed half a million feet of pine timber. This is the first jail sentence on record to be meted out for this offence.

Since the inaugural meeting of the League of Nations Society on May 31, many applications for membership have been received. Among others, a unit of the Army and Navy War Veterans has enrolled its total membership.

## Healthy, Happy Boys and Girls

Is your child healthy? Is he or she up to standard weight, of good color, with plenty of rich, red blood to nourish the growing tissues?

For children who are thin, pale, anaemic, under weight, nervous, restless, sleepless, Dr. Chase's Nerve Food is of the greatest benefit imaginable.

Being mild and gentle in action, and yet wonderfully potent as a restorative, it soon makes the blood rich and builds up the feeble nerves.

30 cents a box, 6 for \$2.75, all dealers, or Edman, Bates & Co., Ltd., Toronto.

## Tangerine Crepe Makes Gay Frock

By Marie Belmont.

Tangerine is one of the colors greatly liked this season. It is chosen for the fashioning of this attractive dress that affects the lines so much admired by the young girl and woman of athletic build. The skirt is straight and slightly shirred at the waist-line. The blouse is cut with a U-neck opening. This, however, is partly filled in by a piece of silk which is designed with blocks of black and tangerine. The short sleeves are adorned in the same manner, while pieces of the checkerboard silk are set in where pockets might naturally be expected.

Rural Route No. 1, Mascouche, Que. The Minard's Liniment People, Sirs.—I feel that I should be doing a wrong if I neglected to write you. I have had four tumors growing on my head for years. I had them cut off by a surgeon about fifteen years ago, but they grew again till about three months ago I had one as large and shaped like a lady's thimble on the very place where my hair should be parted, and it was getting so embarrassing in public that it was a constant worry to me. About three months ago I got a bottle of your liniment for another purpose and saw on the label good for tumors. Well I tried it and kept at it for exactly two months, with the result that it has entirely removed all trace of the tumor, and were it not that they had been cut fifteen years ago, no mark would be seen. I have not been asked for this testimonial and you can use it as you see fit.

(Signed) FRED C. ROBINSON.  
P.S.—I am a farmer and intend using Minard's Liniment on mare for a strained tendon, and am hoping for some results.  
FRED C. R.

## New Invention Proves Valuable

Large Sums Realized by Extracting Gold and Platinum From Sand.

A new machine for extracting valuable minerals from the black sands of the Queen Charlotte Islands has been tried at several places and proven entirely satisfactory. As a result a number of machines have been installed at various points on the coast and are operating. Gold and platinum are extracted from the sands paying fifty cents to one hundred dollars a ton, chiefly platinum.

**Persistent Asthma.** A most distressing characteristic of this debilitating disease is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, a potent remedy for eradicating the disease from the tender air passages.

## Area Sown To Fall Wheat

Largest Proportion Winter Killed Was In Ontario.

The area estimated to be sown to fall wheat for 1921 was 792,200, of which 738,500 acres were in Ontario, 38,000 acres in Alberta and 14,900 acres in British Columbia, according to the first crop report of the season issued by the Dominion Bureau of Statistics. The proportions winter killed are reported as eleven per cent. in Ontario and five per cent. in Alberta; in British Columbia the crop was practically uninjured.

## Canada Chose Her Governor-General

London Times Says Dominion Virtually Made Appointment.

Commenting on the appointment of General Lord Byng as Governor-General of Canada, the London Times says the choice could not be bettered, for it endorses a preference expressed in many parts of the Dominion. "Lord Byng will go to Canada as to the home of countless friends," the Times says.

Though the actual appointment of the Governor-General rests with the King and his advisors in this country, the Times thinks that it is not too much to say that in this instance the Canadian people have made their own choice. If such preferences on such excellent grounds of close personal knowledge could be expressed with the same frankness every time an appointment of the kind had to be made, it would be a good thing for both this country and the Dominions also, is the Times view.

## Killed By Blood Poison

Used an old razor for paring his corns. Foolish because 25c buys a bottle of Putnam's Painless Corn Extractor which for fifty years has been removing corns and warts without pain. No failure if you use "Putnam's." Refuse a substitute, 25c everywhere.

## Doing Things.

Wisdom is knowing what to do next. Skill is knowing how to do it, and Virtue is doing it.—David Starr Jordan.

## A DESIRE TO EAT WHAT YOU WANT

Stomachs Can Be Restored to a Healthy Condition.

Not to be limited in diet, but to eat whatever he pleases is the dream of every dyspeptic. No one can honestly promise to restore any stomach to this happy condition, because all people cannot eat the same things with equally satisfactory results. But it is possible to so tone up the digestive organs that a pleasing diet may be selected from articles of food that cause no discomfort.

When the stomach lacks tone there is no quicker way to restore it than to build up the blood. Good digestion without rich, red blood is impossible, and Dr. Williams' Pink Pills offer the best way to enrich the blood. For this reason these pills are especially good in stomach trouble attended by thin blood, and in attacks of nervous dyspepsia. Proof of the value of Dr. Williams' Pink Pills in cases of indigestion is given by Mr. John A. McDonald, Tarbot, N.S., who says: "Every sufferer from indigestion has my heartfelt sympathy, as I was once myself a bond slave to it. Eating at all became a trial, and as time went on I became a mere skeleton of my former self. I took all sorts of recommended medicines, doctors' and advertised, but to no avail. Then a friend said to try Dr. Williams' Pink Pills. I got a box and I thought before they were done I could feel a change. Then I got six boxes more, and by the time they were used I was eating my meals with regularity and enjoyment. My general health is now good, and it is no wonder that I am an enthusiastic advocate of Dr. Williams' Pink Pills."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

Many a man who is unable to write manages to make a mark in the world.

## Better Times Ahead

Recent Annual Merchants Bank Meeting Gives Encouragement.

In this period of doubt and hesitation concerning the outcome of the economic strain which the financial and industrial world is undergoing in its travel back to normal from the abnormal developments of the war period, expressions of opinion from those who are qualified to express opinion are naturally much appreciated.

From no source, perhaps, comes such valuable information as from banking sources. Bankers sit in the watch towers of industry.

The annual meeting of the Merchants Bank of Canada brought out expressions of opinion from the president and general manager which cannot but have a good effect upon commercial sentiment in Canada. In these opinions was much of warning to industry to go carefully until difficulties in the way of complete recovery have been overcome. At the same time, a strong note of optimism ran through the official remarks, the effect of which is all the more encouraging by reason of the recognition that these remarks were carefully considered and prepared with the knowledge that they would go on record and have an important bearing upon the action of the community.

From Sir Montague Allan, president of the Bank, came the view that the low point of the depression has been passed.

This is a crucial point. From time to time the hope that the worst is behind has been indulged and acted upon with unfortunate results. Matters, instead of improving, became worse and those who made their commitments in the belief that the road had been cleared, came to grief.

Sir Montagu expressed the view that there will soon be a change for the better. While expressing confidence in the future prosperity of the country, he took occasion to advise the customers of the Bank to exercise much caution in making new commitments, at the same time making allusion to the coal strike in England and the unrest and discontent in Europe and the serious financial problems arising therefrom.

He concluded this portion of his address by declaring that, with the known and undeveloped resources of this country, no man here, who is strong and healthy, could long afford to be a pessimist.

D. C. Macarow, the general manager, after alluding to several particulars of the financial statement for the past year, passed on to the discussion of general conditions. In this connection, his viewpoint was one of "tempered optimism," to employ his own descriptive term.

He pointed out that the banking institutions had a large "carry-over" in Western Canada by reason of the unfortunate crop failures, last season, in sections of that country and the resulting financial losses to farmers. A more encouraging note was struck, however, in dealing with the coming crop. Throughout the country, the prospects were now exceptionally promising, and he expressed the fervent hope, in which all will join, that the actual results may measure up to present expectations.

## An Odd Straw Hat.

One of the oddest straw hats in the world is that possessed by a Marienbad, Austria, cafe/keeper. Every straw in it has been touched by the lips of royalty, for the hat is woven from the straws put in the drinks of the crowned heads of Europe who have frequented his cafe.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Don't worry about slander; it will rub off when it gets dry.

An Oil that is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

A spinster who is still living in hope says that the marriageable age is anywhere between the seminary and the cemetery.

Minard's Liniment Lumberman's Friend.

## To Look Young

is a valuable asset to women in business, social and private life. Nothing helps so much as a good digestion. Poor elimination causes one to look sickly and faded.

## BEECHAM'S PILLS

sweeten the stomach, stimulate the liver, promote elimination. This helps purify the blood, improve the complexion, bring the roses back to the cheeks. To look and feel young—Beecham's Pills

The capacity of the Red River Paper Mills will be doubled, with the possibility of redoubling, according to plans now under consideration by the company.

## Nervous Headaches Dizziness

### COULD NOT SLEEP

Wherever there is any weakness of the heart or nerves, flagging energy or physical breakdown the use of Milburn's Heart and Nerve Pills will soon produce a healthy strong system.

They renew lost vitality, build up the strength, increase mental activity, give nerve and brain power, improve the appetite and make rich, red blood, thus banishing nervousness, headaches, sleeplessness, nervous prostration, heart palpitation, shortness of breath, faint and dizzy spells, smothering feeling, anaemia, general debility and all troubles arising from a run down system.

Mrs. M. Damgang, Youngs Cove Road, N.B., writes:—"I was bothered very much with my heart and nerves; had nervous headaches and dizziness, could not sleep nights and my appetite was all gone. I was almost on a nervous breakdown when a neighbor told me to try Milburn's Heart and Nerve Pills. This I did, and before I had the second box used I was better."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## Watchmaker Shows Skill In Boring.

An unusual boring has been performed by a watchmaker at Cambridge, Mass. He bored a hole through a pin lengthwise, and now has the pin with a wire running through the hole, as a proof of his skill. He claims to have worked on the principal of the telephone about the same time as Alexander G. Bell.

More men die of idleness than of hard work.

## PILES

Do not suffer another day with itching, bleeding, or protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c a box; all dealers, or Edman, Bates & Co., Limited, Toronto. Sample Box free if you mention this paper and enclose 2c. stamp to pay postage.

## MONEY ORDERS

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.
